

Epiphany Risk Hunter

Your dedicated guide for hard-to-analyze risks

The Epiphany Intelligence Platform is a data context engine, ingesting and analyzing a wide range of IT, security, and threat data. Epiphany helps security professionals understand and mitigate business risks quickly and easily—before they lead to adverse impacts.

If your organization has a complex network of desktops, laptops, tablets, and IoT devices, you may need a more in-depth evaluation of your operational environment, beyond standard data sources. Epiphany's powerful, intuitive tools let you understand where each threat has the opportunity and ability to disrupt your business. That is the cornerstone of Epiphany's value for your organization.

Unfortunately, some risks can't be automated, mapped, or ingested easily. That's where the Epiphany Risk Hunter comes in. The Risk Hunter is an offensive security professional dedicated to your business and your risk mitigation journey.

The Epiphany Risk Hunter helps you and your organization understand even your hardest-to-analyze risks, beyond those automatically identified by Epiphany. The Risk Hunter pursues risks created by isolated technologies in your environment, including IoT systems, industrial control systems, appliances, applications, and building systems.

By utilizing the power of Epiphany and the intelligence of its Scout support team, the Risk Hunter is armed with advanced weapons to help you hunt, assess, understand, prioritize, and track your deepest risks.

That makes the Epiphany Risk Hunter an exceptionally valuable extension of your security team, dedicated to finding risks that could impact your most critical, hard-to-reach areas.

THE EPIPHANY RISK HUNTER CAN:

1. Serve as your technical advisor on offensive security risks that could impact your business
2. Assess how technologies within your organization could potentially impact your environment
3. Identify and feed your isolated risks and attack paths into Epiphany for evaluation
4. Provide you with a direct channel to the Epiphany Scout team
5. Help you formulate security strategies for technical implementations
6. Integrate your unique organizational data sources directly into Epiphany
7. Prepare technical risk briefings for you and your organization
8. Coordinate integration of your 3rd-party technologies into Epiphany
9. Help Epiphany ingest your 3rd-party consultant assessment data

THE RISK REALIZATION CYCLE

Risk Hunting's strategic approach to finding gaps in risk coverage

The Epiphany Risk Hunter is your offensive security expert, dedicated to customizing Epiphany for your specific needs. The Risk Hunter ensures that you won't be blindsided by surprises, and that your hardest-to-analyze risks won't go unnoticed.

Let the Epiphany Risk Hunter be your eyes and ears across the threat landscape, while you focus on growing and building your business.

Stop fighting your security tools.

See what your true risks look like.
